Claims Rejected

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Gallery '614 or Claussen '108. Both Gallery and Claussen show down hill traveling controllers for vehicles wherein the service brakes are regulated to maintain a pre-set target speed from a plurality of speeds, selectable continuously, the controllers being responsive to the accelerator pedal.

Claims Objected

Claims 4, 5, and 7-20 are objected to as containing allowable subject matter yet depending from a rejected claim. Applicant may re-write these claims into independent form by incorporating all of the subject matter in the independent claim and any intervening claims to render these claims allowable.

Claims Allowed

Claims 21-28 are allowable over the prior art of record. The claims are allowable because the prior art does not anticipate nor render obvious the claimed subject matter of: a downhill speed control system having control means for controlling the strength of applied brake to make an actual vehicle speed matched with a target speed when a vehicle runs down a slope wherein: said control means (100) sets control parameters corresponding to a previously taught condition

of a downward slope, and controls the strength of applied brake in accordance with the set control parameters.

The references cited by the examiner are deemed to be of particular relevance to applicant's disclosure. None of the references appear to show all of the features of the claimed invention.
